

Report Version: 6.1r2

Release Date: Dec 2008

Category: Novell Identity Manager

Report:

# Administrative Activity

| IDENTITY AUDIT REPORT PLUGIN HELP

## Getting Started

This report shows details on administrative activity in Novell Identity Manager that took place within the selected date range, grouped by the requesting user.

**NOTE:** This report is developed based on certain assumptions about how its data sources are configured and used, which audit events they report, and other environmental factors. In some cases if the customer environment is configured differently, the report may not produce the expected results. To ensure that the expected data will appear, Novell recommends that each customer perform controlled tests in an environment as close to production as possible.

The screenshot shows a web interface for the 'NOVELL EDIRECTORY' report category. The report name is 'Novell eDirectory Account Trust Assignments 6.1r2'. A 'Run' button is available to execute the report with new parameters. A 'View' button is available to view a previously completed report. A 'View' button is also available to view a sample report preview. The interface includes a 'Hide' button for the category and a 'Show parameters' link for the report. Annotations on the left side of the image point to the 'Report Category', 'Report Name', 'Completed Report', and 'Report Preview Sample'.
